ABSTRACT

This article identifies today's topical issue - the philosophical and legal basis of modern education of girls who are the future of our country.

Keywords: Family, Constitution, education, early marriage, working profession.

АННОТАЦИЯ

В данной статье обозначена актуальная на сегодняшний день проблема - философско-правовые основы современного воспитания девочек, которые являются будущим нашей страны.

Ключевые слова: семья, конституция, воспитание, ранний брак, рабочая профессия.

INTRODUCTION

*“The eternity of family life, of generations
providing continuity, sacred
which preserves our customs, however
how future generations will grow up to be human
is an educational plane that has a direct impact”*

I. Karimov

Oriental women have always been hardworking and family-oriented. They have always taken responsibility for the well-being of their families and children, with all the strength they have, for any working profession. A woman's scientific potential and mastery of the profession are the basis for stability in the family, social life and society. The future of our young people depends on the educators of our nation. As the great thinkers revered, "If a woman is knowledgeable, the nation will be knowledgeable." Nevertheless, in our society, early marriage and consequent premature births have become a global problem in the lives of girls. The early marriage of our girls, who do not yet have a full understanding of life and are not physically fit, creates a number of irreversible problems, such as family breakdown and the birth of unhealthy children. The Prophet (peace and blessings of Allaah be

upon him) said, "It is obligatory for every Muslim to seek knowledge." (Narrated by al-Bayhaqi).

DISCUSSION AND RESULTS

Young people should first receive compulsory education in general education schools, then, on the basis of the right to choose a profession, to study in higher education institutions or vocational schools after 9th grade, if they have a profession, they will have a different approach to life. were. creating a number of irreversible problems, such as the birth of unhealthy children. The Prophet (peace and blessings of Allaah be upon him) said, "It is obligatory for every Muslim to seek knowledge." (Narrated by al-Bayhaqi). Chapter 14, Article 64 of the Constitution states that "Parents are obliged to feed and educate their children until they reach adulthood." It is intended that the parents bring up their child in every way possible so that he or she can become a necessary person for society. Article 66, on the other hand, states that "adult, able-bodied children are obliged to take care of their parents," in which the parents sees the result. The Prophet Muhammad (peace and blessings of Allaah be upon him) said: "Be kind

to your fathers, and you will be kind to your children." This means that if the child in the family is the future of the family, then all the teenagers in society are the foundation of the future of our country, and our state is carrying out a lot of reforms in the field of education.

Decree of the President of the Republic of Uzbekistan dated November 6, 2020 No PF-6108 "On measures to develop education and science in the new period of development of Uzbekistan" to create a base of students' interest in the profession on the basis of the introduction of the "Career Orientation System" to choose a profession that suits their abilities and interests, to find a worthy place in the labor market, to succeed in their professional activities. special attention is paid to orientation. This Decree stipulates that the training of 15-16-year-old boys and girls in the working profession should prepare our children for adulthood at a time when the current pace is passing. Our daughters mhe reads because education in schools is compulsory. But then the emphasis is on the notion that "it's someone's hatred, if necessary, the spouse will take care of it." However, the higher the education, the more knowledgeable and talented a girl is, or the more perfect a profession is, the more it will "infect" her children in the future, and she will take a responsible approach to raising a harmoniously developed generation. Most of the children in the family are brought up by the mother, so the future of the country is created by mothers with such a worldview.

CONCLUSION

As parents in charge of this problematic issue, they have no right to take their children's future lightly. Some indifferent older adults continue to build families whose foundations are not strong, resulting in increased divorces and an increasing number of orphans and unhappy women. In addition, the fact that children are born out of wedlock contradicts our national traditions and beliefs.

Our basic encyclopedia also states that "Everyone has the right to education. Free general education is guaranteed by the state. Article 41 of the school curriculum is under the control of the state. But our girls study because school education is compulsory. But then the emphasis is on the notion that "it's someone's hatred, if necessary, the spouse will take care of it." However, if a girl has a higher education, the more knowledge and potential she acquires, the more she will "infect" her children in the future, and she will take a responsible approach to the issue of raising a comprehensively developed generation. The future of the country is created by mothers with such a worldview
